PROFILE

Taylor Technology Systems are specialists in the detailed design, installation and maintenance of CCTV, Intruder, Access Control, Fire Detection, Wireless Technology and Power & Data. With over 30 years of experience we are structured to provide service coverage to London and the home counties and to supply bespoke solutions by using the best, technically competent staff coupled with a competitive, first rate service.

PROUDLY INDEPENDENT

We place a strong emphasis on using proven state of the art technology from all manufacturers and we apply our skills in defined market sectors. By not aligning ourselves to any manufacturer or market segment we are able to supply solutions to fit any customer's requirements. This is emphasized by the depth of our client base within the domestic, public and commercial sectors.

“Taylor Technology Systems have achieved and in many cases surpassed our expectations. They have made the workforce feel safe in the knowledge that they can carry out their roles in a controlled and protected environment”.

Neville Dyson, Depot Manager, Hitachi Rail Maintenance (UK) Ltd.

Approved Partners:

24/7/365 SERVICE

A full 24 hour, 365 day service is provided to all contract customers, ensuring that down time is kept to an absolute minimum. In many cases, our engineers can resolve issues over the telephone. They may even have the facility to reset your system remotely or alternatively, guide you through the process.

Response times

We seek to attend to any call out within the same working day if reported prior to 10:00am. Faults reported after this time, which we are unable to attend the same day, will receive a following day response.

Our of hours

We always have a dedicated response engineer on duty, whose sole responsibility is to ensure our stringent standards are upheld. Out of hours faults are still guaranteed a 4 hour response rate.

Workmanship

We put quality first, in both our service and our workmanship. So we ensure all our engineers are trained in the latest systems technology, and continually keep up to date with advances in their field.

WHAT WE DO

We design, install and maintain CCTV, access control, intruder and fire systems; Protecting your premises, staff and assets, allowing you to focus on your business. Our specialist teams will manage your project from concept to completion. Each skilled team member is dedicated to making sure your contract is handled effectively and professionally at all times.

WE SPECIALISE IN

Access Control

CCTV Surveillance

Fire Alarms

Intruder Detection Systems

Power and Data

Wireless technology

“The project involved meticulous planning to interface with a fully operational railway depot minimising disruption whilst installing to programme. The installation is a bench mark for other sites. “ – Lee Collishaw, Depot Infrastructure Manager
